

Aftercare Instructions

Your tattoo is an open wound. Proper aftercare is essential for healing and preserving ink quality.

First 24 Hours

- Leave the bandage/wrap on for 2-4 hours (or as directed by your artist).
- Wash hands thoroughly before touching the tattoo.
- Gently wash with lukewarm water and fragrance-free antibacterial soap.
- Pat dry with a clean paper towel — never use a cloth towel.
- Apply a thin layer of recommended aftercare ointment.
- Do NOT re-bandage unless instructed by your artist.

Days 2-14: Healing Phase

- Wash 2-3 times daily with mild soap and lukewarm water.
- Apply a thin layer of fragrance-free moisturiser after each wash.
- Tattoo will peel and flake — this is normal. Do NOT pick or scratch.
- Wear loose, breathable clothing over the tattooed area.
- Avoid sleeping directly on the tattoo when possible.

What to Avoid

- × Submerging in water (baths, pools, hot tubs, sea) for at least 2-3 weeks.
- × Direct sunlight or tanning beds during the healing period.
- × Gym workouts or heavy sweating for 48-72 hours.
- × Tight or abrasive clothing over the tattoo.
- × Applying alcohol, hydrogen peroxide, or Vaseline.

Long-Term Care

- Apply SPF 30+ sunscreen to healed tattoos when exposed to sunlight.
- Keep skin moisturised to maintain vibrancy.
- Full healing takes 4-6 weeks. Deeper layers heal for up to 3 months.

Warning Signs — Contact Us Immediately If:

- ! Excessive redness, swelling, or warmth beyond 48 hours
- ! Pus, green/yellow discharge, or foul smell
- ! Fever, chills, or red streaks radiating from the tattoo
- ! Severe itching with raised bumps or blistering
