

Aftercare Instructions

Following these steps will keep your cut looking sharp and your scalp healthy between visits.

First 24 Hours

- Avoid touching or rubbing the freshly cut area with unwashed hands.
- If a razor was used, avoid applying cologne or alcohol-based products to shaved areas.
- Keep the area clean and dry for the first few hours.
- Apply a gentle aftershave balm or moisturiser if the skin feels irritated.
- Avoid swimming pools, saunas, or steam rooms for 24 hours after a close shave.

Days 2-7: Maintaining Your Cut

- Wash hair with a gentle, sulphate-free shampoo.
- Apply styling products sparingly — less is more for a clean look.
- Brush or comb in the direction of growth to train the hair.
- Use a moisturiser or beard oil for facial hair maintenance.
- Sleep on a satin pillowcase to reduce friction (curly/textured hair).

What to Avoid

- × Scratching or picking at razor bumps — this causes scarring.
- × Over-washing the scalp, which strips natural oils.
- × Using harsh chemical products on freshly cut or shaved skin.
- × Exposing a fresh shave to direct sunlight without SPF protection.

Ongoing Maintenance

- Schedule your next appointment every 2-4 weeks to maintain shape.
- Use SPF on exposed scalp areas (especially fades and shaved heads).
- Keep beard and neckline tidy between appointments with a trimmer.

Warning Signs — Contact Us If:

- ! Persistent redness, swelling, or warmth beyond 48 hours
- ! Signs of infection (pus, spreading redness, heat)
- ! Severe razor bumps that worsen or become painful
- ! Allergic reaction to any product used during the service
