

Aftercare Instructions

Your tattoo is an open wound. Proper aftercare is essential for healing and preserving the quality of your ink.

First 24 Hours

- Leave the bandage/wrap on for 2-4 hours after your session (or as directed by your artist).
- Wash your hands thoroughly before touching the tattoo.
- Gently remove the bandage and wash the tattoo with lukewarm water and a mild, fragrance-free antibacterial soap.
- Pat dry with a clean paper towel — never use a cloth towel.
- Apply a thin layer of the recommended aftercare ointment (e.g., Hustle Butter, Aquaphor, or coconut oil).
- Do NOT re-bandage unless instructed by your artist.

Days 2-14: Healing Phase

- Wash the tattoo 2-3 times daily with mild soap and lukewarm water.
- Apply a thin layer of fragrance-free moisturiser after each wash.
- Your tattoo will begin to peel and flake — this is normal. Do NOT pick or scratch.
- Wear loose, breathable clothing over the tattooed area.
- Avoid sleeping directly on the tattoo when possible.

What to Avoid

- Submerging the tattoo in water (baths, pools, hot tubs, sea) for at least 2-3 weeks.
- Direct sunlight or tanning beds during the healing period.
- Gym workouts or heavy sweating for 48-72 hours.
- Tight or abrasive clothing over the tattoo.
- Applying alcohol-based products, hydrogen peroxide, or Vaseline to the tattoo.

Long-Term Care

- Always apply SPF 30+ sunscreen to healed tattoos when exposed to sunlight.
- Keep the skin moisturised to maintain vibrancy.
- Full healing takes 4-6 weeks. Deeper layers continue healing for up to 3 months.

When to Contact Us

If you experience excessive redness, swelling, pus, prolonged pain, or signs of allergic reaction (severe itching, raised bumps, blistering), contact us immediately or seek medical attention.
