

Aftercare Instructions

Following these steps will protect your colour, maintain your style, and keep your hair healthy between visits.

First 48 Hours (Colour Services)

- Avoid washing hair for at least 48 hours after colour treatment.
- Do not use hot styling tools (straighteners, curling irons) for 48 hours.
- Avoid swimming pools, saunas, and direct sun exposure.
- Do not tie hair tightly — allow colour to settle.
- Use only colour-safe, sulphate-free shampoo and conditioner.

Ongoing Maintenance

- Wash hair 2-3 times per week with lukewarm water (not hot).
- Use a weekly deep conditioning mask to maintain moisture.
- Apply heat protectant before any hot styling.
- Schedule trims every 6-8 weeks to prevent split ends.
- Book colour refresh appointments every 4-6 weeks.

What to Avoid

- × Over-washing, which strips colour and natural oils.
- × Chlorinated or salt water without a protective leave-in spray.
- × Drugstore box dyes between salon visits — they interfere with professional colour.
- × Brushing wet hair aggressively — use a wide-tooth comb.

Warning Signs — Contact Us If:

- ! Scalp irritation, itching, or burning that persists beyond 24 hours
- ! Unexpected colour change or patchiness
- ! Excessive breakage or hair loss
- ! Allergic reaction (rash, swelling, blistering)
