

Aftercare Instructions

Follow these guidelines to maintain your vehicle's finish and protect your investment.

First 24 Hours

- Do NOT wash or rinse the vehicle for at least 24 hours after detailing.
- Avoid parking under trees or near construction sites.
- If wax or sealant was applied, allow 24 hours to fully cure.
- Do not use automated car washes for at least 2 weeks.

Wax & Sealant Care

- Use pH-neutral car shampoo only — avoid dish soap or harsh detergents.
- Wash using the two-bucket method to prevent swirl marks.
- Dry with a clean microfibre drying towel — never air dry.
- Reapply wax or sealant every 2-3 months for lasting protection.
- Use a spray detailer between washes to maintain gloss and hydrophobic properties.

Interior Maintenance

- Vacuum regularly to prevent dirt buildup in carpets and seats.
- Wipe leather surfaces with a dedicated leather conditioner monthly.
- Use UV protectant on dashboard and trim to prevent fading and cracking.
- Avoid eating or drinking in the vehicle where possible.
- Clean spills immediately to prevent staining.

Product Recommendations

Ask your detailer for recommended products suited to your vehicle's finish. Using the wrong products can damage paint protection or interior surfaces.
